烟台城市介绍 City introduction

Yantai is the first batch of coastal open cities and national innovative cities in China. The development practice of many years proves that science and technology is the primary productive force. Only by technological innovation and deep integration of economy and society can we continuously improve regional comprehensive strength.

This year marks the 40th anniversary of reform and opening up. The state has launched a series of major policy measures to expand openness and promote innovation. In the face of a new round of development opportunities, we will comprehensively implement the spirit of the 19th National Congress of the Communist Party of China, thoroughly implement the new development concept, arm the mind with Xi Jinping's new era of socialism with Chinese characteristics, guide practice, and promote economic and social development in transformation and development.

I. To build a high-quality industry and build a foundation for transformation and development.

According to the idea of cultivating new industry, improving the traditional industry and eliminating the backward industry, focusing on the eight industries such as modern ocean, intelligent manufacturing, electronic information, high-end chemical industry, cultural tourism, medical care, health, high-efficiency agriculture and modern logistics.

I. To build a high-quality industry and build a foundation for transformation and development.

we study the promotion measures, follow up the supporting policies, and strive to use for 3-5 years. It has a first-class level in the whole country, has strong influence on the whole world, and forms a new pattern of leading economic development with new kinetic energy in the ultra-high-100 billion industrial cluster.

II. To promote high-level opening and releasing the vitality of transformation.

The opening to the outside world is the largest advantage, potential and hope of Yantai. By the end of 2017, the city has accumulated a total of more than 100 500 enterprises and transnational corporations, such as foreign capital \$34.23 billion, German Henkel, French Total and other top 500 enterprises and transnational companies to invest in Yantai.

II. To promote high-level opening and releasing the vitality of transformation.

We will make more conscious use of open traction and counter-force, adhere to investment attraction and recruit talents, and introduce a lot of large projects and good projects with high market value, strong industrial relevance and large development space.

II. To promote high-level opening and releasing the vitality of transformation.

Deep integration into “the Belt and Road Initiative” construction, encourage conditional enterprise global layout industry chain, with capacity superiority industry to carry out international capacity cooperation, build a group of overseas economic and trade cooperation park, improve the ability to utilize and configure global resources.

II. To promote high-level opening and releasing the vitality of transformation.

We will accelerate the construction of foreign trade and promote the transformation and upgrading of foreign trade by taking technology, standards and brand as the core.

III. To implement innovation-driven development and foster the momentum of transformation and development.

We will seize the opportunity of the new industrial revolution, strengthen cooperation on "government-industry-university-research and application", and build a demonstration base for school-enterprise cooperation, so as to accurately align the resources of institutions of higher learning with the development needs of the whole city.

III. To implement innovation-driven development and foster the momentum of transformation and development.

We will strengthen the cultivation of innovation entities, guide the agglomeration of innovation elements into enterprises, and create a number of innovative leading enterprises with global influence.

III. To implement innovation-driven development and foster the momentum of transformation and development.

We will promote innovation in key areas and common technologies, and achieve as soon as possible a number of major innovations and breakthroughs in mass technologies in key areas such as intelligent manufacturing, the Marine economy, new materials and bio-pharmaceuticals.

III. To implement innovation-driven development and foster the momentum of transformation and development.

We will build a first-class innovation carrier, promote the construction of major innovation carriers such as the national independent innovation demonstration zone and the national Marine high-tech industrial base on the Shandong Peninsula, and enhance the capability of scientific research, development and industrial support.

III. To implement innovation-driven development and foster the momentum of transformation and development.

We will firmly set up the concept of the first resource for talents, continue to improve the mechanism for cultivating talents, introducing mechanisms and incentive mechanisms, and encourage talents to innovate and start businesses to the maximum extent possible.

IV. To optimize the supporting of the elements and tamping the development basis of the transformation.

IV. To optimize the supporting of the elements and tamping the development basis of the transformation.

We should improve the major infrastructure system, promote the construction of major facilities such as Pan-Bohai Sea, Weifang-Yantai High-speed Railway, Yantai Penglai International Airport Phase II, West Port of Yantai Port crude oil terminal, Wenlai Expressway and so on, and speed up the construction of the modern three-dimensional traffic system.

IV. To optimize the supporting of the elements and tamping the development basis of the transformation.

We will improve the energy and water resources security system, speed up the construction of four LNG projects, Haiyang Nuclear Power Station II and other key energy projects, explore the use of geothermal energy and oceanic energy, and accelerate the formation of a safe, stable, clean and efficient modern energy system. Carry out the three-year action to control the water in the whole area, and realize the multi-water security system of local water, guest water, middle water and sea water.

IV. To optimize the supporting of the elements and tamping the development basis of the transformation.

To innovate the financial service mode, push the enterprises to connect to the multi-level capital market, strive for more enterprises to be listed at home and abroad, and promote the win-win development of investment funds and industrial projects.
